

Maxence Poutord

Software Engineer

I'm Maxence, a French Software Engineer with 10 years of experience developing web-based applications. I am a dedicated, hardworking, ambitious person that gets things done, both on my own initiative and within a team. I enjoy challenges and I am not afraid of getting my hands dirty. Because knowledge sharing matters to me, I spend a non-negligible part of my time sharing things through blog posts, mentoring sessions or conferences.

About

French, 32 years old
+353 83 866 7354

Skills

Proficient

JavaScript
Vue.js
Git
Testing (Jest&Testing library)
Web Accessibility (A11Y)

Comfortable

React.js
Gatsby.js
CI/CD
Web Performances
Node.js
TypeScript
GraphQL

Familiar

Docker
Firebase
Functional Programming

Languages

Advanced

English

Native

French

Intermediate

Spanish

Interests

Canyoning (I guide group), hiking, cooking, travelling (mostly asia), video games (Age of Empire II).

Highlights

- Write technical blog posts in French & English (see maxpou.fr)
- Mentor junior developers and people who want to retrain as a developer
- Tech trainer and public speaker (see maxpou.fr/speaking)
- Open sources lover and occasional contributor (see github.com/maxpou)

Experience

Senior Software Engineer

May 2021 - Present
Orderfox, Remote (Europe)

Migrated a web application to Typescript/React
Led the migration of the main application from a REST-style to GraphQL

Senior Software Engineer

May 2018 - May 2021
VSware, Remote (Europe/Asia)

Improved the frontend infrastructure of a massive Vue.js application (~5k vue&js files / ~650k lines of codes). Frontend relies on a big monorepo (~40 packages)

Software designed and planned major architecture changes towards micro-frontends

Introduced and maintained a testing culture (from 0 to 3.1k unit & integration tests)

Worked on accessibility (A11Y) to meet WCAG AA conformance

Mentored junior developers

Software Engineer

November 2016 - April 2018
Hostelworld, Dublin, Ireland

Co-led the frontend migration of hostelworld.com from jQuery to Vue.js.

Architecture definition, development and maintenance of the main website (back+front)

Trained and mentored team to modern JavaScript and Vue.js

Consultant

May 2015 - April 2016
Conserto, Nantes, France

Architecture definition, development and maintenance of various web applications

Build proof of concepts/research and development

Draft and give training in PHP, Symfony2

Web Developer/Project Manager

October 2011 - January 2015

Energy Formation (ENGIE Group), Nantes, France

Creation of a web application based on the Symfony2 Framework
(expose/consume API)

Led a project which aims to reduce paper consumption by supplying
dematerialized documentation to customers

Education

Architecte Logiciel / Software Architect (master degree)

2013 - 2015

ENI Ecole Informatique, St Herblain, France

Concepteur Développeur Informatique / IT developer designer (bachelor degree)

2011 - 2013

ENI Ecole Informatique, St Herblain, France
